Report (June 15, 2018)

This report covers activity from October 2017 to June 2018

1.- Migration of IEEE-TLT

During the first months of this year 2018 we proceeded to the migration of the IEEE-TLT from the Computer Society website to that of our society, where it is already fully installed (<http://iee-edusociety.org/about/ieee-transactions-learning-technologies>). The most of the migration has been done, although some minor details still are pending.

The editorial of the January-March 2018 issue explains the new situation to all readers (<https://ieeexplore.ieee.org/document/8328991/>).

2.- The News&Notes is running and can be seen in our web-site

(<http://romulo.det.uvigo.es/newsandnotes/>). At the present moment, the editorial board is composed by: Hamadou Saliah-Hassane (Region 7), Henrique Santos (Region 8), Maria Feldgen (Region 9) and Rosanna Chan (Region 10). It's pending of confirmation an editor for Regions 1-6. All collaborations are welcome!

3.- The Steering Committee of Transactions on Education was created (the corresponding charter is attached). The chair is Euan Lindsay, and the other members are Rosa Vasconcelos and Oscar Martínez-Bonastre.

The new composition of the TLT-SC is as follows:

- Education Society (voting members): Edmundo Tovar (Chair), Rosanna Chan, Arnold Pears, and Hamadou Saliah-Hassane.
- Computer Society (voting member): Sabine Graf.
- Circuits and Systems Society (non-voting member): Joos Vandewalle.

3.- Searching of new Editor-in-Chief for IEEE Transactions on Education (TE) and IEEE Transactions on Learning Technologies (TLT). The past April were launched the Call for EiC in TE and TLT (see both calls in the attached documents). The deadline for both calls is June 30. The EiC Search Committee of each publication is composed by the corresponding Steering Committee and the Vice President for Publications of Education Society, who chairs each EiC Committee.

The selection process is planned to finish at the end of next July.

A report to each of the outgoing Editors-in-Chief (Jeffrey E. Froyd and Peter Brusilovsky) summarizing their work during these years will be requested. At the same time, I take this opportunity to congratulate both for their excellent work developed during this time.

4.- Attendance to:

- EDUNINE2018, Buenos Aires, 2018. I attended to the EDUNINE 2018 Conference, in Buenos Aires, Argentina, 14-16 march 2018, where the publications of the Education Society were presented, especially the IEEE-RITA, focusing on the latin-american community.

- POE (Panel of editors) in Los Angeles, CA, USA, 13-14 april 2018. Together with Manuel Castro, as EiC and co-EiC of IEEE-RITA.

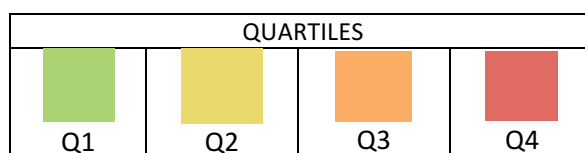

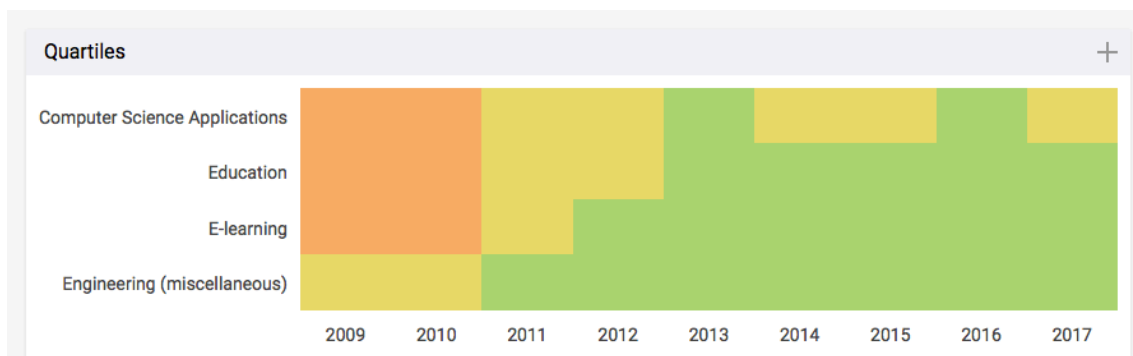

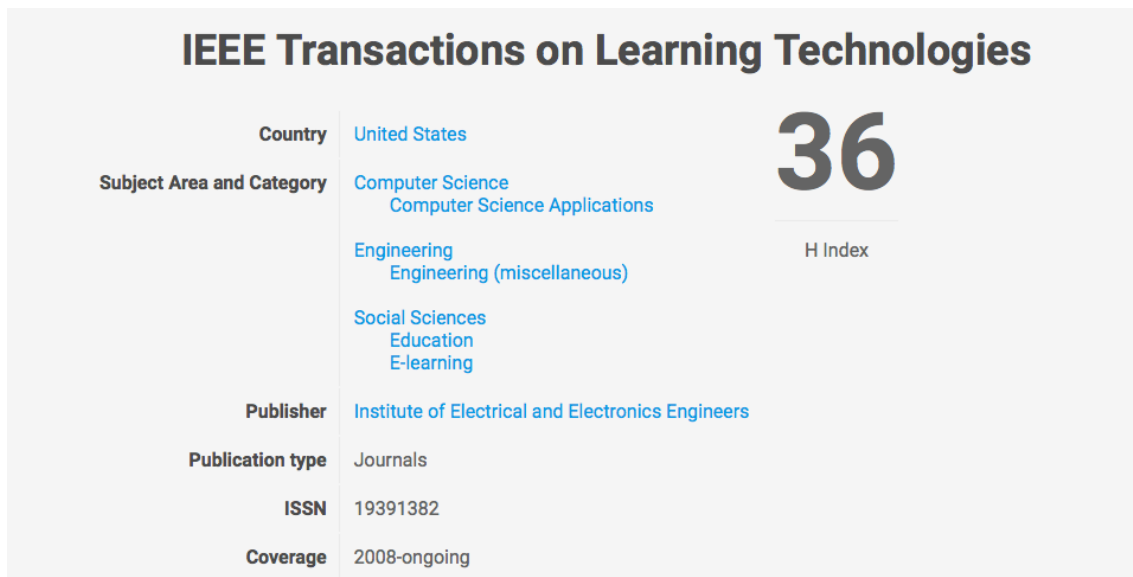

5.- This is a preview of the analysis of our publications in the different rankings: Scimago and Scopus. For the next BoG, the analysis will be completed with the JCR (pending at the moment of writing this report).

Coverage 1969-ongoing

Scope The aims of the IEEE Transactions on Education are both scientific and educational, grounded in the theory and practice of electrical and computer engineering. The scope covers educational methods, educational technology, instructional materials, history of science and technology, and educational and professional development, as well as programs within electrical engineering, computer engineering, and allied disciplines. Manuscripts submitted to the Transactions should clearly embrace one or more of these topic areas. ([source](#))
