

Steven Lingafelt joined IBM in 1982, after graduating from Virginia Tech with a BS in Electrical Engineering and worked in a variety of roles developing network products in both the IBM Network Hardware division and the IBM MicroElectronics division. In the late 90's he transitioned to leading a cybersecurity team protecting IBM's web hosting services and subsequently held a variety of both management and individual contributor roles protecting IBM's internal IT systems and networks. He is party to more than 50 patents in the cybersecurity area and represented IBM in various external cybersecurity forums. More recently, he was a leader in the Cyber Education Project ([www.cybereducationproject.org](http://www.cybereducationproject.org)) and in the creation of the ABET Cybersecurity Engineering program criteria. Steven currently leads the IBM CIO Network Engineering Security and Compliance organization,

responsible for IBM's internal network security.
