July 28, 2025

Final Camera-Ready Paper
Submission for all paper and session
types & Copyright Deadline

CONFERENCE THEME: DIGITAL RIFFS: HARMONIZING ENGINEERING AND COMPUTING EDUCATION FOR THE FUTURE

We encourage authors to consider the FIE 2025 theme for submissions.

The conference features peer-reviewed papers (Work-in-progress (WIP) and Full papers), special sessions, pre-conference workshops, and panels across all engineering and computing education disciplines.

The main tracks (along with some examples) as well as submission instructions for the FIE 2025 conference are listed on the conference website at 2025.fie-conference.org.

FIE welcomes Full Papers up to nine-pages and Work-in-Progress Papers up to five-pages. The work-in-progress and full papers can be categorized into the following categories:

1. **Innovative practice**
2. **Research to practice**
3. **Research**

Work-in-progress papers are typically in frontier areas where it is understood the work is in an early or intermediate stage and authors are seeking feedback from the community. Further, FIE welcomes proposals for panels, pre-conference workshops, and special sessions in order to disseminate scholarly efforts in non-traditional ways.

Abstract submission deadline: February 3, 2025.

FIE 2025 is scheduled as an in-person meeting on November 2-5, 2025. For each accepted paper, one author must register and participate in the conference.

SPONSORS

* Gold dates are specific to Full & WIP Papers

* Blue dates are specific to Special Sessions, Panels, and Pre-Conference Workshops

* Dates with Blue Background are for Full, WIP, Special Sessions, Panels, and Pre-Conference Workshops
